TITLE OF INVENTION: VIBRATION DAMPING APPARATUS FOR RECICPROCATING DRIVE AND CUTTING HEAD

APPLN. TYPE	SMALL ENTITY	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	NO	\$1510	\$300	\$0	\$1810	05/18/2009

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

#### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

## PART B - FEE(S) TRANSMITTAL

## Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE

Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450

or <u>Fax</u> (571)-273-2885

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where

appropriate. ## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 491 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 491 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (http://pair.uspto.gov).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

#### Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/05/08 has been entered, wherein claims 1, 4, 6, 9 and 10 have been amended.

#### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a communication with Donald J. Daley (Reg. No. 35,094) on 02/10/09. The application has been amended as follows:

In the claims:

In claim 1, lines 6-7; "a first counterweight connected to the first rotary shaft, and a first drive shaft connected to the first counter weight" has been changed to -- a first counterweight contacting the first rotary shaft, and a first drive shaft contacting the first counterweight--.

In claim 1, lines 16-17; "a second counterweight connected to the second rotary shaft, and a second drive shaft connected to the second counterweight" has been changed to

Art Unit: 3724

--a second counterweight contacting to the second rotary shaft, and a second drive shaft contacting the second counterweight--.

In claim 1, line 23; "the first conversion mechanism so as not to be in contact" has been changed to -- the first conversion mechanism so as not to be in direct contact--.

In claim 6, line 29; "a belt stretched over the driving pulley" has been changed to --a single looped belt stretched over the driving pulley--.

## Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: The claims are allowable because prior art fails to teach that the first counterweight contacting to the first rotary shaft and the first drive shaft; and the second counter weight contacting the second rotary shaft and the second drive shaft, as set forth with other limitations in claim 1. The prior art also fails to teach a single looped belt stretched over the driving pulleys, the first driven pulley, the second driven pulley and the idle pulley, so that rotational direction of the rotation drive force become different between the first driven pulley and the second driven pulley, as set forth with other limitations in claim 6.

Regarding claims 1 and 16, Irwin (6,067,886) substantially teaches the claimed invention including a vibration dampen apparatus for reciprocating drive, for damping vibration occurring upon conversion of rotary motion from a rotation outputting shaft of a rotation drive source to reciprocal motion in a reciprocating drive direction. Irwin also teaches a first conversion mechanism having a first rotary shaft and a first drive position provided eccentrically from the first rotary shaft to convert a rotary motion of the first rotary shaft to reciprocal motion in the direction of the reciprocating drive direction. Irwin also

Art Unit: 3724

teaches that the first conversion mechanism further includes a first counterweight having a center of gravity in a position on a side symmetric with the drive position with respect to the first rotary shaft, for balancing an offset load occurring upon motion conversion. Irwin also teaches a second conversion mechanism having a second rotary shaft and a second dive position provided eccentrically from the second rotary shaft, to convert a rotary motion of the second rotary shaft to reciprocating motion, via the second drive position, in the direction of the reciprocating drive direction. Irwin also teaches that the second conversion mechanism is provided in pair with the first convention mechanism so as not to be in direct contact with the first conversion mechanism and arranged symmetric with the first conversion mechanism with respect to a reference virtual plane parallel with the reciprocating drive direction, and the secondary rotary shaft rotates at equal speed reverse to and parallel with the first rotating shaft so that a reciprocating motion in the reciprocating drive direction is included in the second drive synchronously with a reciprocal motion converted by the first conversion mechanism.

Irwin does not teach that the rotary driving force from the rotation drive source being transmitted via a belt to the first conversion mechanism and the second conversion mechanism. However, Cain (2,706,637) teaches a rotation drive source for deriving a rotation output from a driving pulley; a first driven pulley provided on the first rotary shaft; a second driven pulley provided on the second rotary shaft so as to be paired with the first driven pulley; an idle pulley provided so as to freely rotate; and a belt stretched over the driving pulley, the first driven pulley, the second driven pulley and the idle pulley, for conveying a rotation drive force from the driving pulley to the first driven pulley and the second driven

pulley so that rotational directions of the rotation drive force become different between the first driven pulley and the second driven pulley.

However, Irwin in combination with Cain does not teach that the first counterweight contacting to the first rotary shaft and the first drive shaft; and the second counter weight contacting the second rotary shaft and the second drive shaft, as set forth in claim 1. Irwin in combination with Cain also does not teach a single looped belt stretched over the driving pulleys, the first driven pulley, the second driven pulley and the idle pulley, so that rotational direction of the rotation drive force become different between the first driven pulley and the second driven pulley, as set forth with in claim 6.

None of these references by themselves or in combination with the other prior art cited teach the claimed invention set forth in claims 1 and 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ghassem Alie whose telephone number is (571) 272-4501. The examiner can normally be reached on Mon-Fri 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley reached on (571) 272-4502. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
